

## Secure data collection portal linking Local Authorities and Early Years Education Providers

**Sentinel's on-line solution enables local authorities to receive, store and manage child assessment data more efficiently and cost-effectively.**

Flexible and adaptable, our web-based portal provides a direct secure link between local authorities and individual early years education providers, enabling assessment data to be supplied quickly and easily.

Held centrally in an intelligent Hub, the data is available for analysis using the system's integrated statistical functions, whilst it can also be shared with other local authority teams and rolled into other solutions such as Single View of Child, MASH or Troubled Families.

Further features and benefits include:

- ▶ **Improved accuracy** with providers using on-line forms to send information that is automatically checked and validated by our system before it can be submitted
- ▶ **Increased control** as data requirements and entry dates are set by you, ensuring you get the information you need, when you need it
- ▶ **Automatic alerts and messages** to the authority and providers if entries are late or if a child's assessment data is a potential cause for concern
- ▶ **Enhanced visibility** through dashboards which summarise the overall status of a setting or of a child across multiple settings
- ▶ **Monitor children's progress** with a host of features to view development and easy identification of those who aren't progressing in line with expectations
- ▶ **Controlled access** to the system with dual factor authentication
- ▶ **Accommodates additional assessment data**, for example from NHS health visitor teams
