

Fully-integrated information to meet all your Phase 2 challenges

We know how difficult it is for local authorities to identify and support families that need to turn their lives around.

- ▶ Data is typically too fragmented, incomplete or inconsistent to safely merge together
- ▶ Immediate and extended family members are often hard to identify
- ▶ Complexity is increased by the introduction of local criteria and the need to collate evidence required to support PBR claims
- ▶ It's hard to see the big picture and evaluate what's working well and what isn't
- ▶ Teams are expected to accomplish this with limited budgets and resources

Sentinel Partners' Think Family solution will enable you to overcome these issues, transforming your programme quickly and cost-effectively.

Developed and built by our data integration experts, Think Family is a powerful data hub that easily and accurately links data from multiple sources. Benefits include:

- ▶ You control the rules to validate and merge people's data
- ▶ You easily set and manage your own criteria
- ▶ Flexible and user-friendly screens highlight families that cross your thresholds
- ▶ Family-overview and drill-down screens show you the full picture
- ▶ Full chronology of events and outcomes for your reporting and PBR requirements
